YOUR STC SOLUTIONS BEGIN HERE!

WE PARTNER WITH AVIONICS MANUFACTURERS AND END USERS TO PROVIDE FAA-CERTIFIED AVIONICS UPGRADE SOLUTIONS.

// Specialists in STC Development

// Certified Solutions for Obsolete Equipment

// Partnered with Leading Avionics Suppliers

// PMA Manufacturing and Kitting Services

// Program Management and Installation Facility Coordination

CERTIFIED SOLUTIONS FOR OBSOLETE EQUIPMENT

- Obsolescence and modification support to reduce maintenance costs
- Direct operating cost efficiency gains via system modernization
- Service bulletin and upgrade offerings
- Compliance with regulatory mandates
- Enhanced onboard health and safety innovation

PARTNERED WITH LEADING AVIONICS SUPPLIERS

- Avionics, both integrated & federated
- Comm, nav, surveillance, connectivity systems
- Electrical systems
- Utility systems
- Cabin passenger systems

SPECIALISTS IN STC DEVELOPMENT

- STC development services from design and testing through certification for Part 23 and 25 aircraft and 27 and 29 rotorcraft including foreign validations of applicable STCs.
- Peregrine's effective, practical working relationships with certification authorities, aviation customers and end users and certification experience guides the development of the most cost-effective program solutions.

PMA MANUFACTURING AND KITTING SERVICES

- Expanded capabilities include fabrication, prototyping and additive manufacturing allowing us to create installation kits to include with our STCs yielding significant cost and schedule savings over traditional tooling and fabrication methods commonly used during STC installation kit development.

PROGRAM MANAGEMENT AND INSTALLATION FACILITY COORDINATION

- Turnkey engineering and program management services to aircraft and equipment OEMs, aircraft owners and operators and Part 145 repair stations for installation and certification of avionics and aircraft systems.
- Licenses and installation support available for existing Peregrine-owned STCs.
