Proposal for STC License and Installation for G150 Flap/Slat Actuator Heaters

James Campbell. N15PV

Sent via email

Greetings:

Peregrine has obtained STC ST01075DE for installation of a flap/slat actuator heater system on G150 aircraft. We offer the G150 flap/slat actuator heater system as a complete System Installation Package to include installation labor.

- Installation would take place at Centennial Airport requiring aircraft downtime of approximately 3 weeks.
- Scheduling would be quoted individually by aircraft but would require approximately two (2) months of lead time assuming normal parts availability from our suppliers.
- Pricing is \$164,500 per System Installation Package with payment terms as follows:
 - \$55,000 at order;
 - \$109,500 at aircraft installation complete.

Thank you very much for the interest. We look forward to working with you to provide this important system.

Best regards,

David Rankin

President
